PROFILE

Data Analyst with internship and freelance experience delivering insights across retail, e-commerce, and financial trading domains. Analysed multi-million record datasets using SQL, Python, Power BI, and Excel to surface trends and support business decisions.

SKILLS

Visualization & Reporting:	MS Excel, Power BI, Tableau
Programming:	Python (Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn), SQL
Databases:	MySQL, PostgreSQL
ETL & Automation:	Power Query, Python Automation, DAX
Analytical:	Data Cleaning, Data Modelling, Statistical Analysis, KPI Reporting, Machine Learning (Basics)

EXPERIENCE

Business Intelligence Analyst Intern

April 2026 – May 2026

Webskitters

Kolkata, India

- Constructed a multi-page Power BI dashboard analysing 50K+ retail transactions across sales, inventory, store performance, and demand forecasting.
- Designed 3+ KPI dashboards and forecasting models to surface revenue patterns; automated Power Query, DAX, and Python workflows, reducing report preparation time by 60%.

Freelance Data Analyst / Power BI Developer

January 2026 – February 2026

Self-Employed

- Developed a client-facing Power BI dashboard monitoring live trading performance, capital growth, and risk metrics using 8+ DAX measures.
- Engineered an automated Excel trading journal, cutting manual entry time by 70% and improving profit booking consistency by 15%.

PROJECTS

Jio AI Product Strategy & Business Analysis | *Market Research + Product Strategy*

🔗 [View on GitHub](#)

- Analysed **7 user segments** using **20+ industry/company sources** to identify AI adoption barriers and develop product, adoption, monetisation, and pricing strategies.
- Developed a **proposed Jio IQ ecosystem** across **7 AI experiences**, defining segment-specific product opportunities and a go-to-market framework covering trust, distribution, pricing, and revenue.

Sales Intelligence & Performance Analytics | *PostgreSQL + Power BI*

🔗 [View on GitHub](#)

- Built an end-to-end PostgreSQL–Power BI pipeline transforming 100K+ orders, 274K+ units, and 5K+ customers into a star-schema model with advanced DAX for KPI, time-series, profitability, and target analysis.
- Identified a ~39% sales decline from 2.06B in 2023 to 1.26B in 2025; found Laptops contributed ~60.4% of revenue and analysed customer, product, and return drivers.

Retail Sales & Inventory Analysis | *PostgreSQL*

🔗 [View on GitHub](#)

- Examined 1M+ records across 50+ stores and 40+ products; found top categories drove 40–50% of revenue, informing stock prioritisation.
- Uncovered stockout and overstock patterns and delivered recommendations to align inventory levels with demand and reduce potential revenue loss.

Customer Segmentation Using RFM Analysis | *Python*

🔗 [View on GitHub](#)

- Performed RFM analysis on a 500K+ transaction e-commerce dataset, segmenting 4,300+ customers into High, Mid, and Low Value tiers.
- Built a data-cleaning pipeline addressing 3+ issues including null values, cancellation invoices, and net-returner customers before segmentation.

Executive Sales Analysis Dashboard | *Power BI*

🔗 [View on GitHub](#)

- Developed a centralised Power BI dashboard with 5+ report pages tracking YoY growth, MoM change, and regional contribution.
- Surfaced 17.7% YoY growth, 3.8% MoM increase, 99.37% repeat customers, and West region contributing ~32% of total sales.

Retail Sales Analysis | *Excel*

🔗 [View on GitHub](#)

- Analysed 13.12M+ records across 50 stores; identified 24.6% YoY sales decline and 32.9% profit drop, pinpointing category-level margin gaps. Built interactive dashboards tracking 29K+ units, AOV (17.57), and category performance, flagging 71% low-stock risk and opportunities up to 70% margin.

EDUCATION

Data Analytics Program

August 2025 – July 2026

Webskitters Academy

BSc in Mathematics

August 2021 – June 2024

West Bengal State University

CGPA: 8.80/10
